Product Description

Is 304 stainless steel rust proof?

There are more than 150 grades of stainless steel out there, and some are simply more prone to rust than others. It's important to consider that, although 304 stainless steel can corrode, it will not rust in normal atmospheric conditions.

Products Description

Product Detail ____

High corrosion resistance makes it usable in harsh environments. It is fire and heat resistant, resists scaling and maintains strength at high temperatures.

Aesthetically pleasing appearance provides a modern and attractive appearance for most architectural metal applications

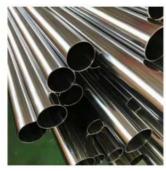

The non-porous surface coupled with the easy cleaning ability of stainless steel makes it the first choice for applications requiring strict hygiene controls, such as hospitals, kitchens and other food processing plants.

Using modern steelmaking technology, stainless steel can be cut, machined, fabricated, welded and formed like traditional steel, so it is easy to manufacture
