Product Description

Products Description

The characteristics of self-cleaning stainless steel mainly include the following points:

1. It does not change the original texture of the surface of metal products, maintaining the texture and appearance of the metal.
2. It has superior adhesion, forming a complete molecular structure on the surface.
3. Good optical properties, transparent and low viscosity.
4. Extremely low surface tension, thus having good hydrophobic and oleophobic effects.
5. Excellent weather resistance and chemical resistance, able to maintain stability in various environments.
6. Superior friction resistance, able to resist long-term physical wear.
7. Good and durable anti-fouling and chemical properties, reducing the frequency and cost of maintenance.
8. Lower dynamic friction coefficient, providing high-quality hand feeling.
9. Good corrosion resistance, able to resist oxidation, acid, alkali and other chemical substances.
10. Good weldability, easy to manufacture, and the smoothness and treatment of the surface further enhance its multifunctionality.
11. Environmental protection, because stainless steel has high recyclability and little impact on the environment.
